

Secure Electronic Messaging

Connecting health professionals!

Since July 2008, GPpartners has connected more than 300 GPs, specialists, allied health providers and pharmacists across Brisbane's northside with Medical Objects secure messaging.

Would you like to enjoy the benefits of instant, secure, electronic correspondence direct with other health providers?

GPpartners can:

- provide Medical Objects electronic message software at no cost!*
- assist you to apply for your Medicare PKI Certificates.
- provide help with applying for your eHealth PIP incentive.
- install the Medical Objects messaging software and Medicare PKI Certificates.
- provide user training.

Tired of faxing and posting? Make an appointment today with our eHealth staff, phone 07 3630 7300.

* Health practitioners are eligible for free use of 'approved' Medical-Objects secure messaging software until 2010.

† The iHealthcare Directory of Services is a state-wide provider directory managed by General Practice Queensland. It aims to provide a comprehensive web-based directory of GPs, specialists and allied health professionals across Queensland. The directory is only accessible by healthcare providers and referrers for direct patient care.

Benefits

- Medical Objects is an eligible supplier of messaging software under the Government's **eHealth PIP incentive** for general practice.
- Simple, fast and secure.
- Works with your clinical software.
- Direct communication to other connected health professionals.
- Reduces time waiting for results or reports.
- Reduces overheads – mail, fax, printing.
- Automatic updates of new versions from Medical Objects.
- Real-time status reports of message delivery.
- Guaranteed delivery.
- Eliminates illegible handwritten or badly copied or faxed information.
- Connection with Medical Objects also connects you to General Practice Queensland's **iHealth Care Directory**[†] of medical practitioners.

Features

- Uses existing Medicare Public Key encryption (PKI) certificates.
- Communications are electronically signed to ensure authenticity.
- Reports are received electronically into your clinical systems and align with patient records.
